Getting Real â€” a must read for anyone building a web app. Getting Real is packed with keep-it-simple insights, contrarian points of view, and unconventional approaches to software design.

Getting Real: The smarter, faster, easier way to build a

A Web API is an application programming interface for either a web server or a web browser. It is a web development concept, usually limited to a web application's client-side (including any web frameworks being used), and thus usually does not include web server or browser implementation details such as SAPIs or APIs unless publicly accessible ...

Web API - Wikipedia

WASHINGTON â€” The U.S. Department of Veterans Affairs (VA) recently launched its first Health Application Programming Interface (API) that will power the next generation of Blue Button features by enabling Veterans to interact with their own personal health data within innovative mobile and web-based apps.

VA Information Technology

In computer programming, an application programming interface (API) is a set of subroutine definitions, communication protocols, and tools for building software.
